VIRTUAL EMBRYO CHALLENGE

P3 SURVIVAL GUIDE

20 October 2026: validation answers become training data; hidden test boards become the ranking target.

THE ONE-SENTENCE CHANGE

In P2 you tune against hidden validation scores. In P3 those validation answers are released for retraining, while test ground truth stays hidden and each board gives you only two official shots.

1. **Retrain**
   validation ground truth joins your usable training information

2. **Predict**
   generate final hidden-test predictions without biological feedback

3. **Freeze**
   hash + lock the exact artifact you intend to upload

4. **Submit**
   up to 2 official submissions per board for the whole phase

DATES

20 Oct P3 opens **2 Dec final submissions due** **4 Dec evaluation starts**
11 Dec winners announced at NeurIPS
